

CASE STUDY – HSBC Building, Harleston

• **Client:**
Carillion Regional Building

• **Project Manager:**
Andrew Brown

• **Principal Contractor:**
Rattee and Kett Ltd

• **Value:**
£55k

• **Date:**
Summer 2008

Description:

Poor quality repairs carried out over the years had left the brick and stone façade and tiled roof in poor repair.

The works involved:

- Rattee and Kett rebuilt the lead box gutter to the correct falls, repaired and replaced rotten window frames and carried out conservation repairs on the façade.
- The bank was then treated to a redecoration using a micro-porous system to restore it to its standing as one of the towns' most interesting buildings.
