• **Value:**
Various £300K - £500K

• **Date:**
2000 works - ongoing

Description

Over the past eight years, Newnham College has had a complete external facade overhaul. This has been mainly carried out during the summer recess to avoid any impact on the students.

The works involved:

- The works have included re-pointing, brick replacement, overhauling of all the external joinery including replacement and repair using the Window Care System, all of which are carried out by our own tradesmen.
- In addition to the above, rainwater goods have been overhauled, the roof checked over and overhauled together with lightning protection and high level chimney repaired and complete external decoration.
